

# *TPI SmartPayments™*

*For Microsoft's Retail Management System (RMS)*

*PC-Based Payment Processing Software*  
*Simple yet Fast and Powerful*

**Lightning Fast**  
**1-3 Second Transactions!**

TPI SmartPayments Plug-in for RMS seamlessly integrates into Microsoft's PC Point-of-Sale Retail Management System (RMS) product for processing credit cards, debit cards, EBT, gift cards and electronic checks.

Use TPI SmartPayments for RMS to route transactions directly to Chase Paymentech's Tampa platform using the Internet for fast secure payment processing resulting in 2-3 second transaction times. Integrated Software provides a lower cost more efficient way to process electronic payments than a traditional payment terminal due to the following benefits:

### **TPI SmartPayments for RMS Enhancements:**

- Lower rates with improved fraud protection with Address Verification (AVS), Card Verification (CV Numbers) and purchase card level II support.
- Support for customer facing multi-lane terminals with signature capture such as the Ingenico eN-Touch 1000, Hypercom L4100 and VeriFone Everest & Omni.
- Support for new payment types like EBT, checks and Chase Paymentech's stored value service FlexCash.

### **Easy as 1,2,3**

1. Install and setup software with Chase Paymentech merchant information.
2. Process order in RMS and select electronic payment type Credit Card, gift, etc.
3. TPI will automatically pop up and process payment and record approved transaction in RMS.

### **It's that fast & easy!**
